

Accsys ESG Data Table 2025

To supplement our approach to ESG reporting and in line with our commitment to transparency and performance reporting, we present our updated ESG data table.

Our ESG reporting efforts primarily commenced in 2020 and have continued to evolve year-on-year, which is why historic data is not always available. However, we have backdated some historic metrics for several external reporting requirements.

Unless otherwise specified the reporting covers Accsys' financial years, where for example, '2025' refers to Accsys' 2025 financial year over the period of 1 April 2024 to 31 March 2025.

For further information on Accsys' approach to sustainability and ESG, please visit the Accsys website where you will find the Accsys 2025 Annual Report and the 2025 GRI Content Index and SASB Report.

	- For diversity information, the data is snapshot data from the 2025 reporting year end (31 March) and covers all reporting entities of Accsys and includes only permanent employees or fixed-term workers as these types make up the largest proportion of workers at Accsys. Fixed term refers to the contract type offered in the Netherlands. Other types of contractors are excluded from this reporting as well as Accsys' Non-Executive Directors. - Senior managers include our Executive Board Members, Senior Leadership Team, and senior managers with the highest levels of strategic influence for the organisation. - Top management positions include maximum two levels away from the CEO or comparable positions. - A number of redundancies were made relating to a reorganisation which explains why the employee turnover figure is higher in FY24.			

	Incidents of discrimination refers to claims of discrimination as determined by a competent tribunal. *The timing of the share plan has changed so there was not an option in FY24 for colleagues to invest. **Cost per hire excludes the hire of the CFO.			
INNOVATION AND TECHNOLOGY				
Research and Development costs are those associated with the Accoya® and Tricoya® processes. Costs exclude those which have been capitalised in accordance with IFRS (see ARA 2025, p. 130 for further information).

- We report on all existing sites where we have active operations, this includes our manufacturing facility in Arnhem, the Netherlands, our Accoya Color® facility in Barry, UK, our Dallas office, and our London office. Please see ARA 2025, p. 51 for further information. - Emissions have been calculated following the GHG Protocol – Corporate Accounting and Reporting (revised edition) using the following databases: IPCC 2006 Guidelines for National Greenhouse Gas Inventories, 2007 IPCC Fourth Assessment Report; and IEA factors (2022). We also use the UK Government GHG Conversion Factors for Company Reporting (2022) - SECR guidance has been followed. - We don't report on all categories for scope 3 for the following reasons: - Category 8 (Upstream leased assets): Emissions from the operations of facilities leased by Accsys are included in Scope 1 and 2. - Category 11 (Use of sold products) - This category is not relevant. Our products do not have direct in-use phase emissions associated with their use, in that they do not consume electricity/fuels for their use or release greenhouse gases over their lifetime. - Category 13 (Downstream leased assets) - All products that we produce are sold and they do not operate a leasing model. Emissions within this category are not relevant. - Category 14 (Franchises) - We do not operate franchises and so this category is not relevant for its Scope 3 Carbon footprint. - Category 15 (Investments) - We have accounted for our Kingsport Joint Venture in Scope 1 & 2.
